Colorado Trails User Group and County Human Services Directors Update

Dear Directors, Committee Members and Stakeholders,

It was discovered yesterday morning, that the end users received an error message when attempting to create a new risk assessment in Trails, and are unable to create the new risk assessment. OIT is aware of this issue and is sti actively working to identify and resolve the problem.

Users are able to read previously created risk assessments and are able to create new safety assessments without issue.

We will send further communications as we learn more.

Colorado Trails Users Group (CTUG) members are being asked to share this information with their respective Trails county users.

Thank you.
